About Your Report

Your Myers-Briggs® Step II™ Interpretive Report is an in-depth, personalized description of your personality preferences, derived from your answers to the MBTI® assessment. It includes your Step I™ results and your four-letter type, along with your Step II results, which show some of the unique ways you express your Step I type.

The MBTI assessment was developed by Isabel Myers and Katharine Briggs as an application of Carl Jung's theory of personality types. This theory suggests that we have opposite ways of directing and receiving energy (Extraversion or Introversion), taking in information (Sensing or Intuition), deciding or coming to conclusions about that information (Thinking or Feeling), and approaching the outside world (Judging or Perceiving).

Everyone can and does use each of these eight parts of personality at least some of the time but prefers one in each pair over the other, just as most people have a natural preference for using one hand rather than the other. No preference in a pair is better or more desirable than its opposite.

The MBTI assessment does not measure your skills or abilities in any area. Rather, it is a tool to help you become aware of your particular style and to better understand and appreciate the helpful ways that people differ from one another.

YOUR REPORT CONTAINS

- Your Step I™ Results
- Your Step II™ Facet Results
- Applying Step II™ Results to Communicating
- Applying Step II™ Results to Making Decisions
- Applying Step II™ Results to Managing Change
- Applying Step II™ Results to Managing Conflict
- How the Parts of Your Personality Work Together
- Integrating Step I™ and Step II™ Information
- Using Type to Gain Understanding
- Overview of Your Results

Extraversion

You focus on the outside world and get energy through interacting with people and/or doing things.

Introversion

You focus on the inner world and get energy through reflecting on information, ideas, and/or concepts.

Sensing

You notice and trust facts, details, and present realities.

Intuition

You attend to and trust interrelationships, theories, and future possibilities.

Thinking

You make decisions using logical analysis to achieve objectivity.

Feeling

You make decisions using person-centered values to achieve harmony.

Judging

You tend to be organized and orderly and to make decisions quickly.

Perceiving

You tend to be flexible and adaptable and to keep your options open as long as possible.

Your Step I™ Results

The paragraphs below and the graph that follows them provide information about the personality type you reported. Each of the four preferences you indicated is shown by a line on that side of the graph. The longer the line, the more clearly you expressed that preference.

Your reported Myers-Briggs personality type
INTP

Your preferences
Introversion | Intuition | Thinking | Perceiving

INTPs typically are logical, analytical, and objectively critical. They like to find the principles underlying interesting ideas and to develop additional principles. They organize ideas and knowledge rather than situations or people. They are curious and can become so absorbed in what they are doing that they lose track of time.

INTPs are somewhat quiet and reserved. However, when a topic is of great interest to them, they have many theories and insights to offer and share with others. Adaptable to changing circumstances, INTPs prefer the challenge of *finding* a solution to the challenge of *implementing* a solution. They consider opposing points of view in an objective, dispassionate manner, applying logic to sort through those views.

INTPs are likely to be most satisfied in a work environment that values logic and allows them to work with autonomy. They want to follow their ideas and find the theories behind them. People can count on them to identify the core of the situation and offer ideas to help others understand the situation logically.

Does This Type Fit You?

Note the parts of the preceding description that fit you and any that don't. Your Step II results on the next pages may help clarify any areas that don't describe you well. If the Step I type you reported doesn't fit, your Step II results may help suggest a different type that is more accurate for you.

Emergent

Your Step II™ Facet Results

The MBTI Step II assessment indicates some of the complexity of your personality by showing your results on five different parts, or *facets*, for each of the Step I preference pairs, as shown on the left. Knowing your results on these 20 facets can help you better understand your unique way of experiencing and expressing your type.

Facts About the Facets

- The five facets within a preference do not cover or explain the full meaning of the preference.
- Each facet has a theme, such as “Ways to connect with others.”
- Each facet has two opposite poles (e.g., Initiating and Receiving).
- The facets are scored differently than are the preferences, and so your five facet scores don’t add up to your Step I preference score.

How to Read Your Step II™ Results

The next few pages show graphs of your facet results. Each graph includes

- Brief descriptions of two opposite MBTI Step I preferences.
- The names of the five facet poles associated with each Step I preference and three descriptive words or phrases for each pole.
- A line indicating your score. The length of the line shows how clearly you scored toward that pole.
 - You are more likely to favor the pole on the same side as your Step I preference, an *in-preference* result, represented by a score of 2–5 on a blue background. Thus you are more likely to favor the Initiating pole if you prefer Extraversion and the Receiving pole if you prefer Introversion.
 - Or you might favor a pole that is opposite to your Step I preference, an *out-of-preference* result, represented by a score of 2–5 on the opposite side on a dark green background.
 - Or you might show no clear preference for either pole, a *midzone* result, represented by a score of 0 or 1 on either side on a light green background.

Below each graph is a chart describing your facet results. The left column lists the facet theme (e.g., “Ways to connect with others”), your facet result, and its category (in-preference, out-of-preference, or midzone). The middle and right columns list ways people with your facet results are typically described. If a set of statements in the chart doesn’t seem to fit, perhaps you would be better described by the opposite pole or the midzone. To understand an opposite facet pole, read the short descriptors for each in the graph above.

INTERPRETIVE REPORT

MYERS-BRIGGS TYPE INDICATOR® | STEP II™

SEAN PORTER

INTP | 5

EXTRAVERSION

Directing energy toward the outer world
of people and objects

INTROVERSION

Directing energy toward the inner world
of experience and ideas

Ways to connect with others

RECEIVING

in-preference

Consider social obligations unimportant and leave them to others.

Prefer in-depth discussion about important issues; hate small talk.

May be seen by others as quiet and shy.

Believe it is intrusive to set people up socially and don't want others to do it for you.

When making telephone calls, prefer to be alone; when receiving calls, see them as unwelcome interruptions.

Communicating feelings, thoughts, interests

CONTAINED

in-preference

Keep your feelings and interests to yourself; when you do open up, others take notice.

Are seen by others as hard to get to know.

Assume others are uninterested in your thoughts.

Feel capable of solving problems on your own and prefer doing so.

Find it very hard to discuss what upsets you, especially when you are distressed.

Breadth and depth of relationships

INTIMATE

in-preference

Would rather relate to a few significant others than be in a large group.

Draw sharp distinctions between friends and acquaintances.

Seek in-depth involvement with individuals.

Respect others' individuality and want the same respect in turn.

Need to trust people before sharing much about yourself.

Ways to communicate, socialize, learn

REFLECTIVE

in-preference

Prefer detached observation and reflection to active participation in the outside world.

Can concentrate better on written material than on someone talking.

Learn and retain material better by reading it.

Feel more secure writing down your ideas than giving an oral presentation.

Level and kind of energy

QUIET

in-preference

Prefer calm, serenity, even silence.

Are bothered by noisy circumstances and places.

Present yourself modestly and prefer to stay in the background.

Don't feel the need to talk in a social situation.

Find that your contributions are easily overlooked.

Have a calming effect on groups.

Like being with other quiet people.

INTERPRETIVE REPORT

MYERS-BRIGGS TYPE INDICATOR® | STEP II™

SEAN PORTER

INTP | 6

SENSING

Focusing on what can be perceived
using the five senses

INTUITION

Focusing on perceiving patterns
and interrelationships

Focus of attention ABSTRACT in-preference	Like to go beyond the surface and read between the lines. May use metaphors to explain your views. Consider context and interrelationships important.	Make mental leaps and enjoy brainstorming. May find it hard to identify the evidence for your ideas. May find it hard to disengage from the tangents you've followed.
How information is used IMAGINATIVE in-preference	Like ingenuity for its own sake. Want to experience what is innovative and different. Are resourceful in dealing with new and unusual experiences.	Prefer not to do things the same way twice. Readily envision what is needed for the future and enjoy strategic planning. May enjoy humor and word games based on nuance.
How ideas are used CONCEPTUAL in-preference	Enjoy the role of scholar and thinker. Like acquiring new knowledge for its own sake. Value mental virtuosity.	Focus on the concept, not its application. Prefer starting with an idea. Find that practical uses for your ideas may come as afterthoughts.
Kind of knowledge trusted THEORETICAL in-preference	Trust theory and believe it has a reality of its own. Enjoy dealing with the intangible. Are future oriented.	Like to invent new theories even more than applying your "old" ones. See almost everything as fitting into a pattern or theoretical context.
Approach to traditions ORIGINAL in-preference	Place a high value on uniqueness. Need to demonstrate originality. Value cleverness and inventiveness.	Would rather figure out your own way than read the directions. Will change things whether or not they work as they are.

INTERPRETIVE REPORT

MYERS-BRIGGS TYPE INDICATOR® | STEP II™

SEAN PORTER

INTP | 7

THINKING

Basing conclusions on logical analysis
with a focus on objectivity

FEELING

Basing conclusions on personal or social values
with a focus on harmony

Ideal decision-making approach LOGICAL in-preference	Believe that logical analysis is best for decision making. Use sequential reasoning, with premises and defined rules, to reach consistent conclusions. Use hard data to make your decisions.	Focus on cause and effect. Like to maintain clear boundaries between issues. Can easily identify the pros and cons of an issue.
Actual decision-making method REASONABLE in-preference	Are confident and clear about your objectives and decisions. Live your life logically, with premises leading to conclusions.	Use reasoning to make decisions. Approach situations as an impartial observer. View situations objectively and analytically.
Ways to handle differences QUESTIONING in-preference	Are intellectually independent. Use questions to clarify ideas. Are precise in your questions, liking to zero in on discrepancies. Are tenacious in getting the answers you need.	May need to have all your questions answered before you can trust any conclusions. Feel questioning is appropriate, even if something is already right.
Communicating about disagreements CRITICAL in-preference	Are argumentative and skeptical. Appear almost unemotional in your interactions. Like to clarify what's wrong, since nothing is perfect.	Take little for granted and concede little. Like to critique, are surprised when others don't accept critiques as justified and helpful. Engage in critique rather than criticism when at your best.
How to carry out decisions TOUGH in-preference	Like to use intellectual and interpersonal pressure to get your way. Focus firmly on achieving your objective. Once a decision has been made, assume there are no alternatives or those available won't work.	Are results oriented and comfortable focusing on the bottom line. Don't pay much attention to people's emotions and may be seen as cold.

INTERPRETIVE REPORT

MYERS-BRIGGS TYPE INDICATOR® | STEP II™

SEAN PORTER

INTP | 8

JUDGING

Preferring decisiveness and closure

PERCEIVING

Preferring flexibility and spontaneity

General organizational style SYSTEMATIC-CASUAL midzone

Like a general plan with some contingencies.
Find too much detail in a plan inhibiting.
Don't mind interruptions if no agenda is in place.

Dislike distractions when involved in a project.
Find that an advance plan permits comfortable deviation because you can always return to the plan.

Approach to planning OPEN-ENDED in-preference

Like to make plans on the spur of the moment, especially in your leisure activities.
Feel that spontaneous plan making happens almost magically.
Prefer flexibility so activities can unfold.

Regret commitments to binding engagements because they close you in.
Have long-range fantasies rather than long-range plans.

Ways to manage time pressures PRESSURE-PROMPTED in-preference

Find that time pressures help you do better.
Are easily bored when not doing something.
Enjoy juggling several tasks, moving quickly from one to another.
Feel most creative under the pressure of a deadline and like being taken by surprise.

Find that your mind is working on an assigned task even though nothing is on paper.
Need to know just how late you can start and still meet the deadline.
Find that success using this approach depends on excellent timing and some planning skills.

Use of schedules and routines SPONTANEOUS in-preference

Enjoy freedom and openness to new experiences.
Are at your best when you're free to work spontaneously.
Don't like scheduling your creativity.

Feel that routine interferes with your ability to respond to unexpected opportunities.
Are uncomfortable with routines and see them as constraints.

Approach to completing large tasks EMERGENT in-preference

Take an informal approach to task completion.
Plunge in without detailed plans.
Operate in a nonlinear way and are able to switch positions in the middle of an argument.

Believe a solution will emerge regardless of where you start.
Like to wait, see what happens, and then "wing it."

Applying Step II™ Results to Communicating

All aspects of your type influence how you communicate, especially as part of a team. Nine of the facets are particularly relevant to communication. Your preferences for these nine facets along with tips for better communication appear below.

In addition to the tips in the table, keep in mind that communication for every type includes

- Telling others what kind of information you need.
- Asking others what they need.
- Monitoring your impatience when other styles dominate.
- Realizing that others likely are not trying to annoy you when they use their own communication styles.

YOUR FACET RESULT	COMMUNICATION STYLE	ENHANCING YOUR STYLE
Receiving	Focus on the task to be done rather than social expectations about introducing people.	Consider that sometimes the task may be better done when people know one another first.
Contained	Keep your thoughts and emotional reactions to yourself.	Recognize when it's really important to say how you feel and then speak accordingly.
Reflective	Like to communicate by reading and writing.	Recognize that your message might not get across unless you're willing to say it aloud.
Quiet	Experience your enthusiasms internally and don't show them to others.	Be aware that others will think you are uninterested; selectively let people know what really interests you.
Abstract	Talk about what you can infer from the here-and-now data.	Be open to the important details that you may be ignoring.
Questioning	Want to ask questions.	Be selective in choosing questions to ask so as not to intimidate people.
Critical	Naturally take a critiquing stance to just about everything.	Recognize that others may mistake your critiquing for personal criticism and be clear when this isn't your intent.
Tough	Embody the phrase "Let's get on with it!"	Be aware that sometimes your way of moving ahead may be wrong for the situation.
Emergent	When working on a shared task, may neglect to let others know what you will work on next.	Try to communicate what you are doing to those who need more pieces of the task up front.

Applying Step II™ Results to Making Decisions

Effective decision making requires gathering information from a variety of perspectives and applying sound methods of evaluating that information. Knowledge of the Step II facets gives us specific ways to enhance our decision making, especially those facets related to Sensing, Intuition, Thinking, and Feeling. Below are general questions associated with those facets. The facet poles you prefer are in blue. If you are in the midzone, neither pole is highlighted.

SENSING 	INTUITION 
Concrete: What do we know? How do we know it?	Abstract: What else could this mean?
Realistic: What are the real costs?	Imaginative: What else can we come up with?
Practical: Will it work?	Conceptual: What other interesting ideas are there?
Experiential: Can you show me how it works?	Theoretical: How is it all interconnected?
Traditional: Does anything really need changing?	Original: What's a new way to do this?
THINKING 	FEELING 
Logical: What are the pros and cons?	Empathetic: What do we like and dislike?
Reasonable: What are the logical consequences?	Compassionate: What impact will this have on people?
Questioning: But what about...?	Accommodating: How can we make everyone happy?
Critical: What's wrong with this?	Accepting: What's beneficial in this?
Tough: Why aren't we following through now?	Tender: What about the people who will be hurt?

Six different ways of evaluating information, called decision-making styles, have been identified based on two facets of the Thinking–Feeling preference pair: Logical–Empathetic and Reasonable–Compassionate.

Your style is **Logical and Reasonable**. This style means that you likely

- Trust the Thinking preference and readily make decisions based on logical analysis of data.
- Recognize the impact of your decisions on people and relationships but see that as secondary.
- Focus on accuracy to achieve a good decision.
- Are seen as precise, objective, and confident.
- Are sometimes seen as inflexible.

TIPS

In individual problem solving, start by asking *all* the questions in the chart above.

- Pay careful attention to the answers. The questions that are opposite to the ones in blue may be key since they represent perspectives you aren't likely to consider.
- Try to balance your decision-making style by considering the less preferred parts of your personality.

In group problem solving, actively seek out people with different views. Ask for their concerns and perspectives.

- Do a final check to make sure that all the questions above have been asked and that different decision-making styles are included.
- If you are missing a perspective, make extra efforts to consider what it might add.

Applying Step II™ Results to Managing Change

Change seems to be inevitable and affects people in different ways. To help you deal with change,

- Be clear about what is changing and what is remaining the same.
- Identify what you need to know to understand the change and then seek out that information.

To help others deal with change,

- Encourage open discussion about the change; be aware that this is easier for some than for others.
- Make sure that both logical reasons and personal or social values have been considered.

Your personality type also influences your style of managing change, particularly your results on the nine facets below.

Review the facets and tips for enhancing your response to change.

YOUR FACET RESULT	CHANGE MANAGEMENT STYLE	ENHANCING YOUR STYLE
Contained	Keep your feelings about the change to yourself and figure out how to handle it on your own.	As soon as you know your own views, talk to someone you trust and get his or her input.
Intimate	Discuss the changes and their impact on you only with those closest to you.	Consider sharing feelings with selected people outside your intimate circle.
Abstract	May make unwarranted inferences about the meaning of the change.	Check out your inferences with some facts and data.
Imaginative	Enjoy the novel aspects of the change and the resourcefulness it requires.	Recognize that there are real costs involved in pursuing novelty.
Theoretical	Put the change into a theoretical system.	Recognize that people's experiences may not be explained adequately by your theory.
Original	Embrace change for the sake of change.	Be selective about which changes are really worth pursuing.
Tough	Will actively embrace or resist change, depending on whether you agree with it.	Step back and consider whether your stance will really get you what you want in the long run.
Open-Ended	Let the changes unfold as they may.	Be aware that others may be uneasy with your unfolding approach; fill them in whenever you can.
Emergent	Decide in the moment what's best to do next; resist planning.	Remember—planning some steps now may prevent problems in the future.

Applying Step II™ Results to Managing Conflict

Conflicts are inevitable when working with others. People of distinct personality types may differ in what they define as conflict, how they react to it, and how they reach resolution. Although sometimes unpleasant, conflicts often lead to improved work situations and enhanced relationships.

Part of conflict management for every type includes

- Taking care of getting the work done while maintaining your relationships with the people involved.
- Recognizing that all perspectives have something to add, but any perspective used in its extreme and to the exclusion of its opposite will ultimately impede conflict resolution.

The table below explains how your results on six Step II facets may affect your efforts to manage conflict.

YOUR FACET RESULT	CONFLICT MANAGEMENT STYLE	ENHANCING YOUR STYLE
Contained	Attempt to solve the issue yourself and keep your reactions inside.	Be aware that trying to solve this on your own may be successful but others also may really need your input.
Intimate	Rely on yourself or a few trusted others in resolving the conflict.	Widen your circle to include others affected; they may have something valuable to contribute.
Questioning	Ask many questions of others to reveal all the issues in the conflict.	Be aware that people may take your questioning style as challenging rather than helpful in resolving the issue; be clear about your intent.
Critical	Point out what is still wrong and needs correcting.	Realize that your style may upset others and try to pull back and be more accepting.
Tough	Push to resolve the conflict immediately so that progress can be made.	Recognize that delays in implementation may be necessary to reach the goal.
Pressure-Prompted	Feed off the pressure of working at the last minute and so fail to recognize that conflict can emerge from this style itself.	Use your style when working alone but set earlier deadlines for yourself when others depend on you to complete tasks.

In addition to your facet results, your decision-making style (as explained earlier) affects how you manage conflict. Your decision-making style is Logical and Reasonable. You are likely to focus on the logic of the situation, thinking that others see it the same way. To make your efforts to manage conflict more effective, keep in mind that not all situations are win-lose, and resist taking a competitive stance.

How the Parts of Your Personality Work Together

The essence of type involves the way people take in information (Sensing or Intuition) and how they make decisions (Thinking or Feeling). Each type has a favorite way of doing those two things. The two middle letters of your four-letter type (S or N and T or F) show your favorite processes. Their opposites, whose letters don't appear in your four-letter type, are third and fourth in importance for your type. Remember—you use all parts of your personality at least some of the time.

Using Your Favorite Processes

People who prefer Extraversion like to use their favorite process mostly in the outer world of people and things. For balance, they use their second process in their inner world of ideas and impressions. People who prefer Introversion tend to use their favorite process mostly in their inner world and to balance this with the use of their second process in the outer world.

Thus INTPs use

- Thinking mainly internally (T_i) to analyze and logically reach conclusions.
- Intuition mainly externally (N_e) to see possibilities and meanings.

Using Your Less Favored Processes

When you frequently use the less preferred parts of your personality, Sensing and Feeling, remember that you are working outside your natural comfort zone. You may feel awkward, tired, or frustrated at these times. As an INTP, you may become excessively logical at first and then become overwhelmed with strong emotions that you may express in inappropriate ways.

To bring back some balance, try the following:

- Take more breaks in your activities when you are using these less familiar parts of your personality—Sensing and Feeling.
- Make an effort to find time to do something enjoyable that involves using your favorite processes—Thinking and Intuition.

Using Your Type Effectively

INTPs' preference for Thinking and Intuition makes them mostly interested in

- Reaching logical conclusions.
- Exploring ideas and possibilities.

They typically devote little energy to the less preferred parts of their personality, Feeling and Sensing. These parts may remain inexperienced and be less available for use in situations where they might be helpful.

As an INTP,

- If you rely too much on your Thinking, you may neglect to compliment people when you should and fail to notice the impact of your decisions on others.
- If you pay attention exclusively to your Intuition, you are likely to miss the relevant facts and details and what past experience might suggest.

Your personality type is likely to develop in a natural way over your lifetime. As people get older, many become interested in using the less familiar parts of their personality. When they are in midlife or older, INTPs often find themselves devoting more time to things that were not very appealing when they were younger. For example, they report greater pleasure in personal relationships and in tasks that require attention to facts and details.

How the Facets Can Help You Be More Effective

Sometimes a particular situation calls for using a less preferred part of your personality. Your facet results can make it easier for you to temporarily adopt a less natural approach. Begin by identifying which facets are relevant and which poles are more appropriate to use.

- If you are *out-of-preference* on one or more of the relevant facets, make sure to focus on using approaches and behaviors related to those out-of-preference facets.
- If you are in the *midzone*, decide which pole is more appropriate for the situation at hand and make sure you use approaches and behaviors related to that pole.
- If you are *in-preference*, ask someone at the opposite facet pole for help in using that approach or read a description of that pole to get clues for modifying your behavior. Once you have a good approach, resist shifting back into your comfort zone.

Here are two examples of how to apply these suggestions.

- If you are in a situation where your natural way of taking in information (Intuition) may not be appropriate, try to modify your Abstract approach (an in-preference result) by considering important facts and details you may have missed (Concrete).
- If you are in a situation where you might need to adapt your way of getting things done (Perceiving), try modifying your Spontaneous approach to accomplishing tasks (an in-preference result) by asking yourself if following some routines (Scheduled) would help you achieve better results in this particular situation.

YOUR STEP II™
INDIVIDUALIZED TYPE

In-Preference

intp

Integrating Step I™ and Step II™ Information

When you combine your Step I reported type and your Step II facets, the result is your Step II individualized type, shown on the left.

You either favored all the facet poles associated with your MBTI preferences or had some facets with midzone results. If your Step I reported type fits you and your Step II facet results fit also, then you seem to have most of the characteristics of your type. Thus your uniqueness within your type is likely based on characteristics not covered by these Step II results.

If, after reading all the information in this report, you don't think you have been accurately described, perhaps a different four-letter type or some variation on the facets will fit you better.

To help you figure out your best-fit type,

- Focus on any type letters you thought were incorrect or any preference pairs on which you had some midzone facet results.
- Read the type description for the type you would be if the letter or letters you question were the opposite preference.
- Consult your MBTI interpreter for suggestions.
- Observe yourself and ask others how they see you.

Using Type to Gain Understanding

Knowledge of type can enrich your life in several ways. It can help you

- *Better understand yourself.* Knowing your own type helps you understand the assets and liabilities of your typical reactions.
- *Understand others.* Knowing about type helps you recognize that other people may be different. It can enable you to see those differences as useful and broadening, rather than annoying and restricting.
- *Gain perspective.* Seeing yourself and others in the context of type can help you appreciate the legitimacy of other points of view. You can then avoid getting stuck in believing your way is the only way. No perspective is always right or always wrong.

Reading about type and observing yourself and others from the standpoint of type will enrich your understanding of personality differences and encourage constructive use of those differences.

INTERPRETIVE REPORT

MYERS-BRIGGS TYPE INDICATOR® | STEP II™

SEAN PORTER

INTP | 16

Overview of Your Results

Your Four-Letter Type from the Step I™ Assessment

INTPs tend to be logical, critical, and analytical. They like solving complex problems and easily point out the flaws in arguments. They are interested mostly in ideas, with little liking for parties or small talk. Quiet and detached, INTPs are most comfortable using a theoretical or scientific approach.

YOUR RESULTS ON THE 20 FACETS FROM THE STEP II™ ASSESSMENT

YOUR STEP II™ INDIVIDUALIZED TYPE

In-Preference INTP

Interpreter's Summary

PREFERENCE CLARITY FOR REPORTED TYPE: INTP

Introversion: Clear (24)

Intuition: Clear (18)

Thinking: Very Clear (29)

Perceiving: Moderate (13)

FACET SCORES AND THE AVERAGE RANGE OF SCORES FOR OTHER INTPs

The bars on the graph below show the average range of scores that occurred for the INTPs in the US national sample. The bars show scores that are -1 to +1 standard deviation from the mean. The vertical line in each bar shows INTPs' mean score. The bold numbers show the respondent's scores.

Polarity Index: 86

The polarity index, which ranges from 0 to 100, shows the consistency of a respondent's facet scores within a profile. Most adults score between 50 and 65, although higher indexes are common. An index that is below 45 means that the respondent has many scores in or near the midzone. This may be due to mature situational use of the facet, answering the questions randomly, lack of self-knowledge, or ambivalence about use of a facet. Some such profiles may be invalid.

Number of Omitted Responses: 0
